

Josue Fernandez

EMS Industry 4.0 Leader

KEMX

▶ Started at Kimball Electronics in 2013

○ Josue resides in Reynosa, Mexico where he spends his free time with his two children riding bicycles and playing outside. He also enjoys taking photos and videos of them to look and see how they grow very fast.

○ One of the professional achievements Josue is most proud of is the IT Team that was established at the KEMX site. Starting off as a small team, it has almost doubled in size after seven years. Several initiatives that the KEMX IT team started working on were later implemented at other locations. Josue expressed remembering how it all started on a whiteboard and seeing how several of those projects have already been implemented make him extremely proud of the team.
